PROFESSIONAL SUMMARY

Data engineer with 1+ year at Cognizant on a large insurance client engagement: ETL development in IBM DataStage (Aug 2025 – Feb 2026), then big data pipeline engineering for the silver layer in the data products team (Feb 2026 – Present). Builds, enhances and supports Hive/Impala/Oozie pipelines that turn source data into business-aligned data products, owning the cycle from development and testing to documentation, client review, deployment and validation. Certified in Databricks (Data Engineer Associate, Spark Developer Associate) and AWS.

TECHNICAL SKILLS

Big Data & Pipelines: Hive, Impala, Oozie workflows, Apache Spark (Databricks), ETL design, IBM DataStage
Languages & Querying: SQL, Python, Shell/Linux
Cloud & Platforms: AWS (S3, Glue, Athena, IAM, SageMaker), Databricks, Gemini Enterprise (agents)
Other: DBMS, Data Engineering and Data Warehousing concepts

EXPERIENCE

Program Analyst | Cognizant Technology Solutions *Aug 2026 – Present*
Data Products Team (Silver Layer) – Insurance Client

- Build and maintain **SQL-based data pipelines** that pull data from source tables via **Hive and Impala** and categorize it into multiple insurance data products per business requirements.
- Orchestrate and trigger pipelines through **Oozie workflows** and run Linux commands to fetch data and execute jobs on a big data platform.
- Implement code changes for new and changing requirements, then test the end-to-end flow with test data before release.
- Prepare documentation and walk through changes in reviews with the client manager and cross-functional team members.
- Own part of the post-approval **deployment** and validate it in the target environment to confirm data correctness.

Program Analyst Trainee | Cognizant Technology Solutions *Aug 2025 – Aug 2026*
Data Products Team (Silver Layer) – Insurance Client | Feb 2026 – Aug 2026

- Joined the data products team and began building and supporting **Hive/Impala/Oozie pipelines** for insurance data products, including change development, testing with test data, documentation and deployment validation.

DataStage Team – Insurance Client | Aug 2025 – Feb 2026

- Designed and maintained **ETL workflows in IBM DataStage** for data extraction, transformation and loading.
- Supported the data sourcing process, collaborating with team members to integrate and organize data from multiple sources.
- Improved existing ETL designs to strengthen data flow and reliability.

PROJECTS

Insurance Data Products Pipelines (Silver Layer) | Tech Stack: SQL, Hive, Impala, Oozie, Linux, Bigdata *Feb 2026 – Present*

- Pipelines for several insurance data products: ingest from source tables, apply business rules and publish categorized, analytics-ready datasets.
- Handle requirement changes, development, flow testing, documentation, client review and deployment validation.

Factory Maintenance Pipeline | Tech Stack: AWS S3, Glue, Athena, IAM, SageMaker *May 2025*

- Built an AWS data pipeline with a team to monitor machine performance and predict potential failures.
- Used S3 for storage, Glue for ETL and crawlers, and Athena for analytical queries and feature generation.
- Configured IAM for secure role-based access and developed a SageMaker model for machine failure detection.

CERTIFICATIONS

Certified Partner – Gemini Enterprise Agent *Oct 2026*
Databricks Certified Associate Spark Developer, Databricks *Jul 2026*
Databricks Certified Data Engineer Associate, Databricks *May 2026*
AWS Certified Cloud Practitioner, AWS *Jan 2024*
CS50P – Programming with Python, Harvard *May 2024*

EDUCATION

VIT Bhopal University, Bhopal, Madhya Pradesh *Sept 2021 – June 2025*
B.Tech in Computer Science with specialization in AI & ML | CGPA: 8.82
GVN The Global School, Bhopal – Class XII: 91.6% | Class X: 89% *2021 | 2019*

LEADERSHIP, ACHIEVEMENTS & PUBLICATIONS

- Design Head, VITronix Club – organized 5 events.
- Bronze medal, State Level swimming competition.
- **YTM But Better** - Browser Extension to elevate music listening experience for YouTube Music.
